

# AJEET GUPTA

Full-Stack & Generative AI Developer · B.Tech CSE (AI & ML)

📍 Vadodara, Gujarat, India • ✉ [ajeetgupta80045@gmail.com](mailto:ajeetgupta80045@gmail.com) • ☎ +91 8787095611 • 🌐 [github.com/gajit9147-dev](https://github.com/gajit9147-dev) •

🌐 LinkedIn • 📄 LeetCode

## PROFESSIONAL SUMMARY

Ambitious Computer Science & Engineering (AI/ML) undergraduate with a solid foundation in modern full-stack web architectures and practical experience integrating Generative AI solutions. Proven record of building and deploying secure web platforms, containerized microservices, and AI prototypes with clean code and modern security standards. Enthusiastic about systems programming, rapid prototyping, DevOps automation, and engineering scalable software.

## EDUCATION

### Bachelor of Technology — Computer Science & Engineering (AI & ML)

Parul University, Faculty of Engineering & Technology · Vadodara, Gujarat

Expected Graduation: 2028 / 2029

Currently in 3rd Semester · CGPA/Merit Track

**Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming (Java/C++), Operating Systems & Linux Administration, Database Management Systems (SQL/NoSQL), Machine Learning Fundamentals, Computer Networks.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript (ES6+), TypeScript fundamentals, C/C++, HTML5, CSS3/Tailwind

**AI & Machine Learning:** Generative AI, Prompt Engineering, Google Gemini API, OpenAI API, LLM Integration, RAG Architectures, Scikit-Learn

**Frontend Engineering:** React.js, Vite, Next.js basics, Tailwind CSS, Liquid Glass UI, Framer Motion, Responsive UX, State Management

**Backend & APIs:** Node.js, Express.js, RESTful API Design, JWT Authentication, CORS, Rate Limiting, Middleware Architecture

**Databases:** PostgreSQL, MySQL, MongoDB, Relational Schema Design, Query Optimization, Mongoose, Prisma ORM basics

**Cloud, DevOps & Tools:** Docker, Git & GitHub, Linux (Ubuntu / Red Hat CLI), AWS (EC2, S3), Nginx, Postman, Vercel, Figma, VS Code

## FEATURED PROJECTS

### InnerVoice — Full-Stack Personal Notes & Journaling Space 2026

[React](#) · [Vite](#) · [Node.js](#) · [Express](#) · [PostgreSQL/MySQL](#) · [Docker](#) · [Nginx](#) · [AWS](#)

- Built an end-to-end full-stack personal notes application featuring high-performance rich text editing and real-time state synchronization.
- Implemented secure authentication with **JSON Web Tokens (JWT)**, password hashing (bcrypt), and role-guarded RESTful API endpoints.
- Containerized client and server microservices with **Docker & Docker Compose**; orchestrated production deployment on **AWS EC2** behind an **Nginx reverse proxy** with custom SSL and caching.

### Ajeet Portfolio — AI-Integrated Interactive Developer Showcase 2026

[React](#) · [Vite](#) · [Tailwind CSS](#) · [Framer Motion](#) · [Node.js](#) · [Gemini 2.5 Flash](#) · [Vercel](#)

- Engineered a high-performance modern developer portfolio showcasing technical projects, GitHub telemetry, and live LeetCode stats integration.
- Implemented a proprietary **Liquid Glass UI design system** featuring backdrop blur filters, fluid gradients, and dynamic interactive hover micro-animations.
- Embedded an intelligent conversational assistant powered by **Google Gemini 2.5 Flash API** enabling recruiters to query project details and technical skills interactively.

### Project DNA & PromptWars — AI Project Evaluation & Prompt Engineering Arena 2026

[React](#) · [Vite](#) · [JavaScript](#) · [Generative AI APIs](#) · [REST APIs](#) · [Tailwind CSS](#)

- Created an automated evaluation interface leveraging Generative AI to multi-dimensionally score ideas across technical feasibility, innovation, skill match, and market value.
- Built dynamic comparison analytics, structured scoring rubrics, and modular React components for seamless visualization of project viability benchmarks.

## CERTIFICATIONS & ACTIVITIES

### Red Hat Certified System Administration (RH124 & RH134) — Red Hat Training Jul – Aug 2026

Completed 80 credit hours of intensive system administration training. Acquired proficiency in Linux kernel commands, bash shell scripting, user/group security policies, process scheduling, LVM storage, and system service diagnostics.

### PromptWars Hackathon x Parul University — Participant & AI Prototype Builder Sep 2026

Competed in an intensive vibe-coding hackathon. Conceptualized, built, and deployed a working Generative AI application prototype using advanced prompt engineering and Google Antigravity within 24 hours.

### AI Tools & Generative AI Workshop — be10x Certification 2026

Completed certification focusing on applied AI productivity, prompt design patterns, automated content pipelines, and AI-accelerated programming workflows.

**Core Competencies:** Problem Solving · Full-Stack Web Development · REST API Engineering · Docker Containerization · Linux/Bash Automation · Generative AI Integration · Rapid Prototyping · Clean Code & Debugging · Cloud Deployment (AWS/Vercel)
